-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on October 14, 2005
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan in combination with Anderson et al. Sullivan teaches a device such as claimed except for the sensor. ~~Anderson et al.~~ Anderson et al teach the use of light to provide both diagnosis *du* and treatment and the use of a diffusive cover. It would have been obvious to the artisan of ordinary skill to employ the diffusive cover of Anderson et al in the device of Sullivan, since this would provide diffusion, as taught by Sullivan, while allowing closer placement of the device to the patient, and in either case, to employ triple junction diodes, since these are commercially available and known in the art to be useful for producing multiple color combinations (see the instant specification, page 5, lines 16-22); and thus producing a device and method such as claimed.

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan in combination with Anderson et al, as applied to claims 1-4, 9, and 10 and further in combination with Wilden. Wilden teaches the use of a sensor to determine whether or not the device is in a treatment position, and if it is, automatically turning the device on. It would have been obvious to the artisan of ordinary skill to employ the sensor and automatic treatment initiation electronics of Wilden in the device of Sullivan, since this would provide greater safety, as taught by Wilden, and to employ a second processor to interpret the data from the sensor and actuate the treatment; thus producing a device and method such as claimed.

Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
